BREAK AMONG THE INDIVIDUAL COAL OPERATORS.

Tollow in the Wake of the Big Com panies and Railroads and Offer

Is the General Belief-Mitchell Wil Call a Joint Convention When all Companies Make Same Offer.

HAZLETON, Pa., Oct. 5.-A. Parde & Co., operating the Cranberry and the about 1,000 men, posted a notice at its collieries this afternoon of an advance of 10 per cent in wages. The notice

"This company makes the follow ing announcement to its mine em

ployes:
"It will adjust its rates of wages so "It will adjust its rates of wages so as to pay to its mine employes on and after October 1, and until further no-tice, a net increase of 10 per cent on the wages heretofore received."

"NOTE—It is understood in the

foregoing that powder will be sold to miners for \$1 50 per keg and that the difference between this rate and the old rate of \$2.75 shall be taken into account in figuring the net advance of 10 per cent noted above for this class of work.

(Signed.) "A. PARDEE & CO."

This is the first individual operation

in the Lehigh region that has granted dicate that all of the individual operators have agreed to pay the advance.

A meeting was held this afternoon in Pardee's office, of the general superintendents of all the individual collieries in this region. It is not known what action was taken, but it is believed they discussed the question of posting similar notices at all collieries.

HAZLETON, Pa., Oct. 5.-The belief prevalent here to-night that the anthracite coal strike is approaching an end is considerably strengthened to-day by the action of the individual operators in following the lead of the big coal carrying and coal mining railroads in the wages of their employes. The first break among the individual operators in this district was made to-day when A. Pardee & Company, operat ing the Cranberry and Crystal Ridge collieries, offered its employes a 10 per cent net increase in wages and a reduc-tion in the price of powder to \$1 50 per keg. The decrease in the price of pow der is to be taken into account in the advancing of the wages. That four more of the individual mine owners will make the same offer is hardly doubted.

Superintendents Invited. It was learned to-day that before th

dee company, several of the general superintendents of other individual coal companies were invited to the Pardce company's office in this city for the purpose of giving their views on the These representatives did not say

what their companies would do, but it was learned that the consensus of opinion was that if the mine owners wish to keep their collieries in operation they would have to increase the wages of their men. None of the superintend-ents at the meeting would say anything in regard to the report that the conl to the individual operators in the matter of freight rates. The representareduced the rates to any individual company in this region.

Strikers Standing Firm.

President Mitchell, of the United Mine Workers, is much interested in the advance made by the individual companies, but would say nothing for publication. There is a strong belief here that Mr. Mitchell is waiting for all the coal companies in the anthracite region to offer the 10 per cent increase before he will call a joint convention to consider the proposition. Mr. Mitchell would say nothing on this particular subject. He has all along adve cated unity of action and it is this that strengthens the opinion that he will call the convention after all the companies have made an offer. He continues to say that the strike cannot be settled without a convention and he is waiting on the operators.

In the meantime the men now strike, said to number 138,000, are, not wavering under the proffered increase

Company. American Book Company.

Judge Jackson also granted an in junction restraining the American Bool Company from selling Harvey's English grammar to school boards, or attempting to sell it, for use in the schools of this state. The suit for the injunc tion is a new phase of the old school book fight between D. C. Heath & Co. and the book trust. In 1895, the logislature adopted Hyde's

language lessons, published by Heath, for use in all schools except the high schools, and Harvey's grammar to be

used in the latter.

Heath brought suit to determine his rights, and Judge Jackson, in an elaborate opinion, overruled a demurrer of the defendants and the case was to have been tried at Martinsburg this month. Heath now claims that the trust is endeavoring to sell its books to the country school boards in violation of the rights of the plaintiff. In granting the injunction, the court declined to date for the hearing, because the main case was to come up within a few days.
